

# Worksheet 3: Building a Grade Level Concept- Calculating finding a missing attribute given area and volume

Calculating width when give area and length:

Calculating width when give volume, height, and length:

$$\text{Green Square} = \text{Blue Square} \times \text{Orange Square}$$

$$\frac{\text{Green Square}}{\text{Orange Square}} = \frac{\text{Blue Square} \times \text{Orange Square}}{\text{Orange Square}}$$

$$\frac{\text{Green Square}}{\text{Orange Square}} = \text{Blue Square}$$

width

$$\text{White Square} = \text{Blue Square}$$

width
