

Worksheet 4: Building a Grade Level Concept (Calculating Changes in Area)

length x width = area

$$\begin{array}{c} \text{_____} \\ \text{Length} \end{array} \times \begin{array}{c} \text{_____} \\ \text{Width} \end{array} = \begin{array}{c} \text{_____} \\ \text{Area} \end{array}$$

$$\begin{array}{c} \text{_____} \\ \text{Length} \end{array} \times \begin{array}{c} \text{_____} \\ \text{Width} \end{array} = \begin{array}{c} \text{_____} \\ \text{Area} \end{array}$$

$$\begin{array}{c} \text{_____} \\ \text{Larger Area} \end{array} - \begin{array}{c} \text{_____} \\ \text{Smaller Area} \end{array} = \begin{array}{c} \text{_____} \\ \text{Difference in Area} \end{array}$$
