

Worksheet 2: Building a Grade Level Concept (Calculating Area)

length x width = area

$$\begin{array}{c} \text{Length} \quad \times \quad \text{Width} \quad = \quad \text{Area} \\ \hline \end{array}$$

$$\begin{array}{c} \text{Length} \quad \times \quad \text{Width} \quad = \quad \text{Area} \\ \hline \end{array}$$

Worksheet 2: Generalization

Betty has a garden where she plants tomatoes, lettuce, cauliflower, and broccoli. Her garden is 8 feet by 4 feet. What is the area of her garden?

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Length Width Area

Jerry is making a quilt. He has cut a piece of fabric that is 3 feet by 5 feet that he will cover in quilt squares. What is the area of his quilt?

Area = length x width

Area = _____
